Gloss Acrylic Spray Paint

Superior Coverage

Thick like butter, smooth like margarine.

→ Early on, we established the importance of opacity. Paint that covers well the first time lets you get your work done quickly with fewer coats, on almost any surface. It starts with a high concentration of artist grade pigments, which are ground a minimum of four times in a ball mill to create smaller particles. The result: a dense paint formula which has been refined to help paint flow without blocking or compromising coverage.

So whether you're getting busy on timber, concrete, steel or raw brick, you can expect paint to go on thick, with levelling properties that also make for smooth painting of canvas, pottery and plastics. We got you.

Vibrant Finish

You got to burn to shine.

→ Shine* so bright they'll be begging you for eye-relief.

From panging purples to blues that go BOOOOONGGG! Bright opaque oranges, or more subtle tones, you have over 100 unique colours to choose from. Add a brilliant gloss finish that stays smooth thanks to our resin's levelling capabilities, and you've got a recipe for colour schemes that pop off any surface.

With endless colour possibilities, you can create fresh fades, clean patterns, or add depth and contrast to your work to help it stand out. *Sunglasses sold separately.

UV Resistant

Standing the test of time.

→ When you're creating artwork in environments as harsh as the Australian summer, you wanna make sure the fruits of your labour hold up against the elements. Ironlak's current formula boasts high quality artist-grade pigments, similar to those used in the automotive industry.

Independent weather simulation tests at a laboratory in Florida and our own real world tests under the brutal Brisbane sun have demonstrated a strong resistance to UV exposure. Couple this with a strong paint film that prevents oxidation and helps retain lustre, your work will stay alive outdoors for years to come.

Variable Output

More control. Less effort.

→ When you start to spray with the new Ironlak spray can, your fingers can feel the difference. Our valve's softer spring provides less resistance on your spritzing finger and combined with a balanced propellant ratio, gives you greater control over paint output. Pop on a skinny cap and half-nozzle it to get ultra-thin lines or create fine details. Press a little harder and you've got the perfect pressure for super sharp outlines. Bang on a fat cap and you'll fill large areas super fast. Hold back a little to create a thinner line, then pump it harder to flare your line out all in one motion. With many different nozzles to choose from, your options are limited only by your imagination, and your can control. Switch it up.

Visit Ironlak.com to learn more.

Created to Create.

→ Ironlak was born out of a desire to make quality spray paint more accessible. The end game was simple – more artists, making more art. The new and improved Lak represents the next frontier of graffiti spray paint. Over the last few years, we've incrementally redesigned every aspect of our product – and refined our quality control processes – to deliver you a spray can that is more reliable and an absolute dream to paint with. With upgraded pigments that last. A softer, more versatile valve system. And vibrant colours that offer superior coverage without blocking. You can create your work with confidence. Rediscover Ironlak today and make your mark on society.
